Fuel Filter Special for Diesel Trucks

In-Store
20% off

Diesel fuel is by nature, quite dirty, so it makes sense that the fuel filter is one of the most important filters on any diesel application. They usually require a change **every 10,000 to 15,000 miles** whereas a modern gasoline fuel filter could go 100K+ miles before a change is needed – if at all.

Must present coupon at time of arrival to be validated. Cannot be combined with any other offer. See dealer for details.
