

Exp. 12.31.2025

OEM Wiper Blades

In-Store
15% off

There are a few signs that your wiper blades need to be replaced. Examine your wipers for signs of wear such as tears in the blade, ragged edges, a loss of flexibility in the rubber or bends or cracks in the wiper arm or blade. All these issues prevent your wiper blades from making full contact with your windshield, which can limit your visibility.

Must present coupon at time of arrival to be validated. Cannot be combined with any other offer. See dealer for details.
